[Latency Optimizer 3 0 Serial Rar 11](#)

Application to SPECfp_rate

- In 2007, I mined the SPEC results database for all Opteron system results on Linux using the PathScale compiler for all SPECfp benchmarks (CPU2000 & CPU2006)
- E.g., for SPECfp2006 this included
 - 29 published result sets
 - 13 different Hardware + Benchmark configurations
 - Varying number of copies of the benchmark run concurrently
 - Varying CPU frequency
 - Varying number of sockets (changes idle memory latency)
 - Execution time varied by 1.5x to 1.9x across results
